Talented Resources

BUSINESS MODEL

This is the common and most preferred model by our client as it extends the team of client's software department with our experts. Here client is free to choose their team member from our pool of talented resources by interviewing them. In this case client will have a complete involvement and direct control through project management softwares and high-speed communication tools.

**Hire Dedicated
Developers Model**

**Hire From
US**

Time & Material Model

This model is used for those clients whose requirements are specific with the deadlines, costing and project milestones. It will ensure few or minimal changes/modification during the execution of the project which saves time of both client and company.

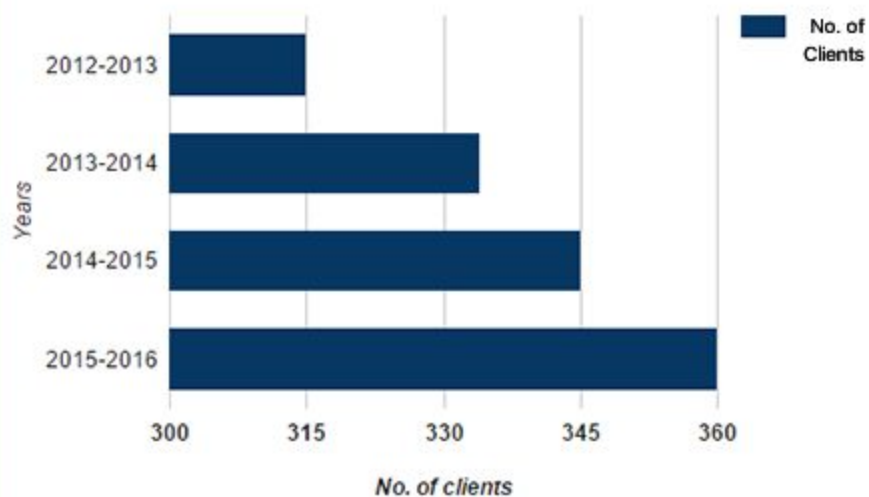

This model is suitable where requirements are complex and not cleared. It helps in flexibility of pricing and delivering the work like hourly, daily, weekly or monthly. The project development cycle is controlled by client's inputs and directions. The price of working hour will be fixed with the mutual discussion and there will be no hidden charges.

Fixed Price Model

CLIENT & EMPLOYEE'S FEEDBACK

CLIENTS

I have worked with Moon Technolabs for many years and have always found their work quality to be really good & their service to be even better. Always responsive and pro-active which makes working with them a pleasure. My primary contact is Jayanti K. and he is fantastic – Jay is the main reason I will always work with Moon Technolabs

David P
USA

I worked with Moon Techlabs to develop a social mobile application for Android and IOS platforms. The team has shown a high level of technical and project management skills. Communication at all levels was also very good. The project was on time and on budget & I recommend this company.

Mike Behar
USA

Moon Technolabs have helped me in designing & developing this attractive iPad/iPhone Coloring book app and have supported me from scratch till uploading the app on App stores. I am highly recommending them for the best company in iPhone and iPad app development.

Vincent Clyncke
for Coloring Book App

EMPLOYEE

A good company which treats the Employees like a family, which an amazing journey for the employee. Transparency of work & continuous help is the key point of the organization which leads in growth of an employee. I enjoyed working in this company where equality of thoughts is present.

Good work culture for freshers.

HR Team

Healthy workplace for an employee. Got a good support all the time. The company is recognising their employee by awarding them Employee of the Month for their remarkable performance which is a best part, as it is motivating the employees for performing. We've been working in Moon Technolabs since 4 years, and till date never seen something wrong happening here and something is not in favor of employee.
